Dear Colleagues,

We invite you to attend this 2 ½ day conference at Stanford, starting Thursday, September 5, 2013. We have assembled a distinguished list of speakers, all leading investigators in this emerging and exciting area, from all over the world. These speakers are doing cutting edge work developing advanced methodology for probing all aspects of the properties and dynamics of single cells, what makes cells different, and how these differences affect development and disease. While broad in scope, we hope to emphasize recent works related to neuroscience, cancer and stem cell biology.

Please register at the meeting web site <http://singlecellanalysis.stanford.edu>. If you are interested in presenting a poster, indicate this on the registration page. We are happy to answer questions sent to: singlecellanalysis@stanford.edu.

Steven G. Boxer
Stanford University

Daniel Chiu
University of Washington

Symposium Speakers (as of June):

Nancy Allbritton (UNC and NCSU)
Jim Eberwine (University of Pennsylvania)
Takashi Ito (University of Tokyo)
Ulf Landegren (Uppsala University)
W.E. Moerner (Stanford University)
Kennedy Okeyo (University of Tokyo)
Jerald Radich (Fred Hutchinson Cancer)
Hsian-Rong Tseng (UCLA)
Sunney Xie (Harvard University)

Bianxiao Cui (Stanford University)
Andy Ewing (Chalmers University)
Hideki Kambara (Hitachi, Tokyo)
Rich Mathies (UC Berkeley)
Garry Nolan (Stanford University)
Stephen Quake (Stanford University)
Jonathan Sweedler (University of Illinois)
Catherine Wu (Dana-Farber Cancer)
Richard Zare (Stanford University)

ALL ATTENDEES MUST REGISTER: <http://singlecellanalysis.stanford.edu>
